Hyperthyroidism, autoimmune
Panic disorder
Chronotropic incompetence
Atrial flutter
Other

Fast & easy to use with no learning curve!

Helps primary care

Easy to organize the pertinent history, with software-generated questions (clinical or lab) based on the evolving clinical picture. Displays the differential diagnosis and a SOAP note.

Improves triage by specialists

Enables primary care to provide the information needed for specialist triage and better referrals.

Helps specialist nurse practitioners, EMTs, genetic counselors and residents

Uses standard medical terminology but with explanations.

Interoperable output

Can be used by the specialist directly in the Dashboard, via an editable SOAP note for an eConsult or via the EMR.
